

Help with rattly breathing

See and hear

Noisy breathing

Changes in breathing rate

Moments of stopped breathing

Ooze from mouth

Your loved one will not be worried by this noise. If you notice that breathing stops for a short time, this is normal. You do not need to give medicine.

Do

Keep a calm place

Change their position – on the side and/or more upright

Give medicine as prescribed

Talk, stay, connect...

Special things
