

Printing instructions for colour-coded labels for syringes

The labels developed by caring@home are designed to be printed using:

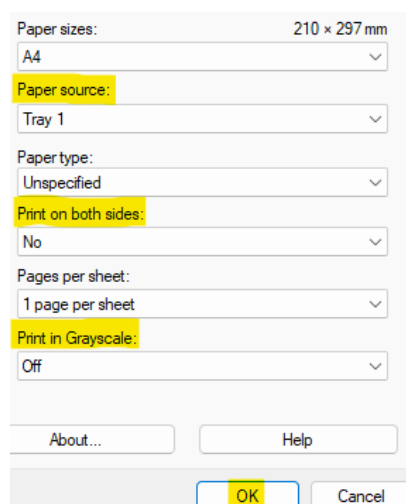

- Avery L7157 Address Labels (33 labels per sheet 64 x 24.3mm)

Each printer will be different, however to ensure alignment, it is recommended you print only one sheet of labels at a time and use the following printer settings:

- Download the labels from the [caring@home website](#) and save a copy to your local network. **Do not print the labels directly from the website, as it will not be an accurate print.**
- Open the document on your local network.
- Click File in the menu bar, then Print
- Once the print screen has opened, click on Printer Properties

- In the Printer Properties select the following:
 - Print 1 sided
 - Print in colour OR turn off print in greyscale
 - Select the tray your labels are located in
 - Select ok

- Once your properties have been confirmed, press print. Repeat steps above for each new label.

We recommend you print one page at a time and check to make sure each page has printed accurately before proceeding with the next page.
